Summary

Nice to meet you. I want to tell you a little about my hobbies and myself. I really like sports and computers and everything related to them. You can familiarize with my professional qualities in my resume. In addition, I love sports, now I do tennis, boxing and go to the gym, but my favorite hobby is riding a BMX. Sports activities force special diets to always be in shape and therefore I adhere to proper nutrition. I would like to conclude that in the future, I am interested in projects related to healthcare; the sphere of finance is also of interest.
